August 10th 2019

Kikonyogo Community Development Center

Summary of the center since MSG first support in 2013

In 2013 we received funding from Moenchs-eegymnasium and we were so grateful.

Our biggest plan was to make a kindergarten and primary school. But also urgent was the need for water.

So we worked on bringing water to the community center first

Plans were made and a big underground water tank was built.

Meanwhile we also met new friends from Germany (BELU Ugandahilfe e.V.) who have since then continued to support us to carry on with the project at Kikonyogo.

The new Kindergarten - Belu Kindergarten Kikonyogo started Term One 2019 officially on 28th January, 2019, and ended on 3rd May, 2019 with a total number of 38 pupils.

Term Two 2019 started on 27th May, 2019 and will be ending on 23rd August, 2019. This term we have got a total number of 39 pupils.

We very much appreciate the Belu team, Moenchsee Gymnasium and lots of other funders. Thank you so much for believing in our work and helping us enable the children acquire better education.

Our request this year

The kitchen:

At the moment, the school has no kitchen structure: we are just using a temporary shade to serve as a kitchen. (Shown below). The structure is very open exposing the food to any kind of danger like water being splashed to food during a rain day; Wind can also blow dust to food being prepared, worst of it all, ill minded people can easily access the food which makes us worried that at one time they may even poison the food.

We request to be assisted with funds to construct a permanent structure of a modern kitchen so that we may avoid all these risks. The construction is estimated to take Ush 15,000,000

We sincerely appreciate your contribution towards this noble cause of maintaining hygiene and good health among the children.

Kind regards

KCDC team in Masaka Uganda.
